AI Engineer | Ph.D. Researcher

Professional Summary

AI engineer and Ph.D. candidate in Computer Science at Doshisha University, researching Human-AI collaboration with world models. My current work focuses on how agents infer human cooperative intent from observed actions and interaction dynamics. I bring eight years of technical experience across software engineering, Azure SDK development, cloud authentication, enterprise IT, and independent AI systems.

Education

Doshisha University	Ph.D.	Computer Science	2023.09-Present
Doshisha University	M.Sc.	Computer Science	2021.09-2023.09
Shanghai University of Engineering Science	B.Sc.	Computer Science	2012.09-2016.07

AI Projects & Research

Job Application Agent

- Built an LLM-based job-search assistant for resume analysis, recruiter Q&A, and role-specific applications.
- Designed a multi-agent workflow for evidence-grounded outreach and output evaluation.
- Added recruiter-question answering grounded in verified resume information.

Ph.D. Research

- Researching Human-AI collaboration with world models to infer cooperative intent from actions and interaction dynamics.
- Designed COVS, a continuous-action Overcooked simulator for multi-agent coordination.
- Published COVS in the International Journal of Activity and Behavior Computing (2026).

Publication

International Journal of Activity and Behavior Computing (2026)

Xinlong Wang, Kota Toyoda, Miho Ohsaki, and Kimiaki Shirahama. "A Continuous-Space Overcooked Simulator for Multi-Agent Coordination." Published in IJABC, 2026.

Employment History

Döhler Shanghai IT Engineer, APAC 2017.01-2018.05

- Maintained regional workplace infrastructure and supported SAP and QAD business-system workflows.
- Resolved incidents and service requests for APAC users under established SLA requirements.
- Coordinated system maintenance and upgrades with regional and international technical teams.

Shanghai Wicresoft Software Engineer, Azure SDK 2018.05-2020.07

- Developed C# functionality for Azure Identity and Key Vault libraries in the Azure SDK for .NET.
- Worked with the U.S.-based Azure engineering team on mock tests, end-to-end tests, and issue resolution.
- Created samples and developer documentation for authentication and service-integration scenarios.
- Contributed through GitHub issues and code review across locations and time zones.
- Verified SDK behavior with mock and end-to-end tests aligned with GA quality expectations.

Career Transition & Independent Study 2020.07-2021.09

- Returned home during COVID-19 to support family while continuing structured computer science study.
- Prepared for graduate school and the transition from production engineering into AI research.

Dow Chemical IT Infrastructure Intern 2015.07-2015.10

- Supported enterprise IT infrastructure, end-user systems, and incident resolution.
- Documented recurring issues and coordinated resolutions with internal support teams.

Project List

Open Source Contribution

- **Microsoft Azure SDK for .NET Contributor**
- Implemented C# authentication functionality for Azure Identity and Key Vault.
- Added mock tests and end-to-end tests for SDK behavior and GA quality.
- Created samples and README documentation; resolved issues through public GitHub collaboration.
- Contributions were merged into Microsoft repositories; Arctic Code Vault Contributor.

Azure Identity: github.com/wantedfast/azure-sdk-for-net/tree/master/sdk/identity/Azure.Identity
Azure Samples: github.com/Azure-Samples/app-service-dotnet-access-key-vault-by-msi-for-web-apps
Cloud Design Patterns: <https://github.com/mspnp/cloud-design-patterns>

Skills

C#, Python, .NET
LLM agents, multi-agent systems, world models
Azure SDK, Azure Identity, Linux, Windows, networking

Prize & Honor

- JASSO Scholarship
- Doshisha University Scholarship (S Level)
- Outstanding Leader of Co-Learning Program
- Outstanding Undergraduate Paper

Additional Projects

AI Trading Helper

ACTIVE PROTOTYPE

A local-first tool that turns trading screenshots and files into structured facts, review notes, observation plans, and reminders. It does not provide investment advice.

Gangke Zhihui

VOCATIONAL EDUCATION MVP

A teacher-in-the-loop workflow for assignments, rubrics, student submissions, AI-assisted scoring, review, and skills dashboards.

Goods Change

CLOSED-TEST BUILD

A campus community app for free item exchange, pickup requests, private chat, and in-person handoff, without payment or delivery features.
