Position: AI Engineer

Professional Summary

AI Engineer and Ph.D. candidate in Computer Science focused on LLM-based agents, human-AI collaboration, and multi-agent reinforcement learning. Experienced in software engineering, cloud systems, Azure SDK development, authentication and IT infrastructure, with 8+ years of technical experience across international engineering and support environments.

Education

Doshisha University	P.h.d	Computer Science	2025-2028
Doshisha University	Master	Computer Science	2023-2025
Shanghai Institute of Technology	Bachelor	Computer Science	2013-2017

AI Projects & Research

Job Application Agent

- Develop an LLM-based job-search assistant to support resume analysis, employer question answering, and position application.
- Built a multi-agent workflow using OpenAI SDK to generate and evaluate personalized cold emails for job seeking.
- Developed an AI agent to answer recruiter questions based on applicant resume information

Phd Research

- Designed an Overcooked continuous-action simulator (COVS) for human-AI and coordination research in a continuous action space.
- Explored diffusion model-based behavior cloning from demonstrations to accelerate policy learning in more realistic coordination settings.
- Investigated the use of Vision-Language-Action (VLA) models to improve generalization to unseen partners and unseen environments in cooperative coordination tasks.

Publication

ABC 2026 Conference

Wang Xinlong, et al. "A Continuous-Space Overcooked Simulator for Multi-Agent Coordination." ABC 2026 Conference, accepted.

Employment History

Dohler Shangahi IT Engineer APAC 2017.01-2018.05

- Maintained IT infrastructure and business systems across the Shanghai region, including SAP and QAD.
- Provided technical support for APAC end users under SLA requirements, supporting system availability and performance.
- Collaborated with international IT teams on infrastructure and system upgrade projects across regional offices.

Wicresoft Software Engineer 2018.06-2020.06

- Contributed to Microsoft’s Azure SDK for .NET, including projects such as azure-sdk-for-net, azure-samples, and cloud-design-patterns
- Collaborated with the U.S. based Azure SDK team to develop and improve Azure Key Vault and Azure Identity features using C#
- Developed and executed mock tests and end-to-end tests for Azure SDK components, ensuring compliance with General Availability (GA) quality standards
- Resolved community-reported issues, created sample applications, and wrote clear, developer-friendly README documentation for open-source projects

Transition period due to COVID-19 2020.06-2022.12

Returned to my hometown during the peak of the COVID-19 pandemic to be close to and support my family. During this time, I worked temporarily at a friend’s company while continuing my studies in computer science to prepare for graduate school applications

Dow Shanghai IT Service Engineer 2022.12-2023.03

- Provided technical support and consultation for Microsoft Office, Windows OS, and network connectivity issues.
- Maintained data center infrastructure and collaborated with IT teams to troubleshoot incidents.
- Handled service requests in alignment with SLA requirements and maintained service documentation.

Project List

Open Source Contribution

Microsoft Azure SDK for .NET Contributor

- Contributed to Microsoft Azure SDK open-source projects, including azure-sdk-for-net, azure-samples, and cloud-design-patterns.
- Collaborated with U.S.-based Azure SDK engineers on Azure Identity and authentication-related components in C#.
- Implemented and tested AzureCliCredential-related SDK components using mock tests and end-to-end validation.
- Created sample applications and developer-friendly README documentation for cloud integration scenarios.
- Contributions were merged into official Microsoft Azure repositories; recognized as an Arctic Code Vault Contributor.

Azure Identity: github.com/wantedfast/azure-sdk-for-net/tree/master/sdk/identity/Azure.Identity

Azure Samples: github.com/Azure-Samples/app-service-dotnet-access-key-vault-by-msi-for-web-apps

Cloud Design Patterns: <https://github.com/mspnp/cloud-design-patterns>

Skills

C#, Python: Intermediate to Advanced

Linux: Experienced

LLM & AI Agents: Intermediate to Advanced

Prize&Honor

- Jasso Scholarship
- Doshisha University Scholarship(S Level)
- Outstanding Leader of Co-Learning Program
- Outstanding Undergraduate Paper in University
